

Foothills Medical Centre West Tower

Calgary, Alberta

Owner:
Calgary Health Region

Architects:
Cohos Evamy Integratedesign

Construction Value:
\$295.0 million

Type of Contract:
Construction Management

Located on the Foothills Medical Centre complex in Calgary, Alberta, this new facility is the first phase of a major 'redevelopment' envision for the existing hospital.

All aspects of design and planning embrace flexibility, efficiency, functionality and future growth considerations. At completion, this phase will house new operating suites, an 'all new' intensive care unit, new medical laboratories, as well as inpatient units having views of the Bow River Valley.

Although constructed at the 'back' of the existing hospital, a new road system and interchange over Calgary's 16th Avenue will provide a new west entrance to the hospital complex.

A new 615 underground parkade will be developed as part of this phase of the project.

New Construction	Renovation & Additions
